King Motors

L. D. KING

T. Geo. Wood, district manager
Canadian Sugar Factories, addressed
the Lethbridge Board of
Trade on Thursday of last week.

Owen Hill, salesman for Canadian
Sugar Factories, was in attendance
at the Lethbridge Corn
Show on Wednesday and Thursday
with a big exhibit of Raymond
Sugar.

A FREE DIAMOND RING—
will be given away at the Rex
next Thursday night in conjunction
with the screening of Zane Grey's
"Code of the West". Regular
prices will prevail, 15c and 30c.

Mrs. M. Sutton of Lomond was
a visitor here this week, the guest
of Mrs. Geo. Mangan.

Robbery at Pumpkin Center Store

The Russian storekeeper down
at Pumpkin Center (E.J. Shaffer's
farm) complained to the police last
Saturday night of having been
beaten, overpowered and robbed of
\$75 by three men, one of whom
walked in and knocked the light
out before being re-enforced by
the other two. The storekeeper
could give no description of his
assailants, nor clue to their identity.

Basketball Entries

This season the A. A. B. A. will
operate the following leagues:

1. Men's senior, entrance fee \$5
per team.
2. Men's intermediate, \$5 per
team.
3. Men's high school and junior,
\$2.50 per team.
4. Women's senior, \$5 per team.
5. Women's intermediate, \$2.50
per team.

No restrictions as to players'
qualifications will be placed on the
senior or intermediate leagues in
either section, as any club may
enter two teams in the same
league.

In place of the men's high school
league, as in operation last year,
the men's high school and junior
league will be operated this year.
Junior teams must be comprised
of players not reaching
their nineteenth birthday by Jan.
1, 1926.

This year the entries, accompanied
by fees, must be in the hands
of Sec.-Treas., H. D. Weaver, Raymond,
on or before December 1.

NEWS NOTES

King Motors sold a late model
light delivery Ford to the Knight
Sugar company this week. The
new model is equipped with the improved
Ruckstell axle.

Miss Mary Woolley and Miss
Pauline Redd now hold the positions
resigned by Miss Alice Evans
and Miss Leah Holt at the Mercantile store.

L. L. Paek purchased a new
model light delivery Ford from
King Motors this week. This garage
received a carload of new Ford
models on Monday, and expects
another carload soon.

Fine weather the past few days
has worked wonders with the
beet harvest and digging in this
district is practically finished. Topping
and hauling is proceeding
rapidly. Operations in other districts
are not quite so far advanced.
Threshing, too, is on full swing.

If these new balloon pants get
any wider the fellows will start
acting like the girls do on windy
days.

Mr. Wing, John Blackmore,
Mrs. E. Weed, Viola Alexander
and Lura Redd of the stake board
were in attendance at the conjoint
session at Stirling on Sunday of
last week.

Owing to extreme ill health, the
Deputy Minister of Municipal Affairs
of the provincial government, J. H. Lamb,
has retired, and his place has been taken by W. D. Spence,
who for some years has been tax commissioner.

Famous Welsh Male Singers Coming Here

C. F. Tollestrup, acting for the
Stake Choir, has booked the world
famous Rhondla Welsh Male
Singers to appear in the Stake
House, December 20th. These
singers, numbering 16, won the
world's championship at Pittsburg
last year.

Walt Zobell Gets Big Beet and Wheat Crop

A yield of 46½ bushels of wheat
per acre on a 50 acre field is reported
by Walter Zobell, who finished
threshing last Saturday under
most unfavorable conditions.
This same piece of ground yielded
44 bushels per acre last year. Mr.
Zobell attributes this excellent record
partly to fall irrigation.

He has also just finished harvesting
10 acres of beets. The first
five acres yielded at the rate of 20
tons and the last five at 18 tons
per acre.

A Brighter Day For Europe

It is a long time that has no turning. For seven long and difficult years a rope has been travelling a rocky road trying to find a way out of the morass of hatreds, bigotry, racial discords and suspensions, and the financial wreckage following the conclusion of the Great War. Conference has followed conference, commission after commission has struggled with the problems involved, the League of Nations has patiently sought to smooth away difficulties, remove misunderstandings and create a general feeling of confidence, the while supplying checks to naive and aggressive action calculated to re-open old scores.

Slowly but surely progress was made notwithstanding the fact that the United States refused to join in the League or to participate in conferences and commissions except those which involved questions affecting payments of war debts, in which the United States is vitally interested. Had the United States, removed, as it is, from the local prejudice and jealousies of continental Europe, taken a disinterested part in helping to work out European problems, it is safe to say that greater progress would have been made, and the standing of the United States among the nations of the world would have been immeasurably higher today.

Great Britain, however, true to all her great traditions, and notwithstanding her own many and serious domestic problems and existing war debt, steadfastly planned and worked for the salvation of Europe. Possibly to a greater extent than ever before has Great Britain demonstrated her world leadership. This may not be fully appreciated as yet, but future historians when they come to record the progress of world events and European reconstruction after the Great War can hardly fail to award credit to whom credit is due.

And at last the turning in the long lane would appear to have been reached in the conclusions unanimously arrived at by the conference recently concluded at Locarno, Switzerland, and effect to which will shortly be given by the signing of six new treaties, and one of which is a document by which Germany, France and Belgium agree to arbitrate all disputes among themselves, with Great Britain and Italy as guarantors. In other words, should Germany break faith, both Great Britain and Italy are automatically arrayed with France and Belgium; should France or Belgium violate the agreement, Great Britain and Italy will support Germany.

Unlike the old Triple Alliance between Germany, Austria-Hungary and Italy, or the alliance between France and Russia, or the Rome-Berlin Entente between Great Britain and France, which were pledges to go to war in support of each other should certain contingencies arise, this new treaty is one guaranteeing peace and the prevention of war.

The credit for the Locarno conference belongs to the Foreign Secretary of Great Britain, Lord Austen Chamberlain, who brought it about and presided over it. His was the driving genius which led to the final removal of all obstacles and brought about this happy culmination which, it is agreed by all observers and students of international affairs, ushers in an entirely new era in European politics.

One of the reasons why the League of Nations will be the early entry of Germany into full membership in the League of Nations. So long as the great central nation of Europe remained outside, the League could not possibly become the dominating factor in Europe and the world which its creators designed it should be. But with Germany in the League of Nations will become reality in an entirely new sense. Many of its greatest difficulties and most serious problems will thereby be removed. It may even pave the way for a changed public opinion in the United States and the ultimate acceptance of the League Covenant by Canada's next door neighbor, a consummation most devoutly to be wished.

Trouble In Far East

Chinese Crisis is Cause of Anxiety to Japanese Government

The London Daily Express correspondent at Tokyo says the Japanese Government is showing great anxiety over the outcome of the present Chinese crisis, owing to the possibility that it might eventually lead to another Russo-Japanese war.

Should General Wu Pei Fu and his allies drive Chang Tso Lin from Manchuria, the dispatch says, Japan would be faced by the loss of her Manchurian concessions, for which she would fight rather than give up.

Shatters Medical Myth

Lord Dawson, personal physician to King George, shatters an old medical myth by prescribing for heart disease a quiet day in bed, followed by an evening at the theatre with an easy round of golf the following day. Heart muscles, he says, are better for exercise as well as rest.

Buy Diamond Dyes—in other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Hospitals Approved

American College of Physicians Set Seal of Approval on Saskatchewan Institutions

At the convention of members of the American College of Physicians and Surgeons in Philadelphia recently, the following Saskatchewan hospitals were approved, having complied with requirements for certain standards:

One hundred or more beds: Grey Nun's Hospital, Regina; Moose Jaw General Hospital, Moose Jaw; St. Paul's Hospital, Saskatoon; Saskatoon City Hospital, Saskatoon. Fifty to 100 beds: Holy Family Hospital, Prince Albert; Hugh Waddell Memorial Hospital, Camora; Notre Dame Hospital, North Battleford; Providence Hospital, Moose Jaw; St. Elizabeth Hospital, Humboldt; Victoria Hospital, Prince Albert.

Nothing less than love could make a girl give up a good job for one that pays nothing.

When hoarse use Minard's Liniment

B.C. Apple Crop

Heavy Crop is Reported This Year in Southern British Columbia

Penikese, Naramata and Summerland are this year gathering the heaviest crops of apples that the orchards have ever produced. The crop is of excellent quality and is being handled expeditiously through the packing houses. One grower reported that he picked 51 boxes of McIntosh Red off one tree. Another said he gathered 64 boxes and still another picked 54 boxes.

Subdues Sore Throat In a Short Time

When a severe cold grips your throat, when it makes you gag and cough—that's the time you ought to apply good old "Nerviline." This wonderful liniment strikes right in, penetrates to the very core of the affected region. You get a truly wonderful effect from Nerviline, and for sore throat, tight chests and bad colds nothing else will act the same as Nerviline. Five times stronger than other liniments, full of pain-subduing power, Nerviline is a necessity in every home. Get a 35c bottle to-day.

May Improve Silk Industry

Report That Japanese Professor Has Perfected Two Inventions

Prof. Ryugo Inoue, of the Seirei Technical School in Utsunomiya is reported to have perfected two inventions that are expected to greatly affect the silk industry. One of these is said to be a device to produce new silk from old rags and scraps, while the other is a simple method of obtaining silk direct from silkworms without waiting for the formation of the cocoons.

Her Nerves Were "All Broken Up" She Could Not Sleep

Mrs. David Gallagher, 37 Lyndhurst Ave., Hamilton, Ont., writes: "My nerves were all broken up and I could not sleep at night, and I would have to get up out of bed and walk the floor for hours at a time."

After Using a Box of

I Began To Feel Much Better, and after using a few more boxes I could enjoy my rest as well as ever I could."

M. & N. Pills have been on the market for the past 32 years; your nearest druggist sells them; put up only by The P. Milburn Co., Limited, Toronto, Ont.

One-Dish Dinner

In many families it is a problem to serve up a simple meal on one course. Here is a dish that will please a family of six, besides having the indispensable elements of nourishment:

- 2 cups cooked macaroni.
- 1 cup cooked carrots (diced).
- 1 tablespoon grated onion.
- 2 tablespoons chopped parsley.
- 2 tablespoons chopped fresh red pepper.
- 1 cup chopped ham.
- 8 tablespoons buttered crumbs.
- 1 cup lardless St. Charles Milk.
- 1 cup water.
- 2 tablespoons butter.
- 2 tablespoons flour.
- 1 teaspoon salt.
- 1/2 teaspoon paprika.

Cook macaroni in boiling salted water 35 minutes. Make a white sauce of butter, flour, milk, water, salt, paprika. Place a layer of macaroni in a well-greased baking dish. Sprinkle with ham, carrots and seasonings. Repeat until all are used. Pour over all the white sauce. Cover top with bread crumbs and bake in a moderate oven for 40 minutes.

In some sections of Kentucky a rifleman who cannot hit a nail head at a distance of 120 feet is considered a poor shot.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Things never are as bad as they seem. Think how many, many people never need a lawyer.

Pigeons Killed By Aeroplane

Flock Passed Through Rapidly Revolving Propeller of Passenger Plane

A flock of pigeons recently flew into one of the propellers of a Hanley-Page passenger aeroplane, which had just left Croydon Aerodrome on a flight to Paris.

Usually birds avoid aeroplanes and the pilot was surprised to see the pigeons fly straight towards the machine and apparently pass through the rapidly revolving propeller of the star-board engine.

The aeroplane suffered no ill effects, but about 30 dead pigeons were picked up just outside the aerodrome.

CHILDREN LIKE THEM

Baby's Own Tablets Are Effective and Easy to Give

You do not have to coax and threaten to get the little ones to take Baby's Own Tablets. The ease with which they are given, as compared with liquid medicines, will appeal to every mother. None is spilled or wasted; you know just how big a dose has reached the little stomach. As a remedy for the ills of childhood arising from derangements of the stomach and bowels they are most satisfactory.

Mrs. Rosa Voyer, Willimantic, Conn., says: "I used Baby's Own Tablets in the Canadian Northwest and found them a wonderful medicine for children's troubles, especially indigestion and constipation. I have also given them to my children for simple fever and the restlessness accompanying teething and they always gave relief. I can recommend Baby's Own Tablets to all mothers."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wave Length Changed

The Canadian, British and United States entered into an agreement by which wireless ships of all three countries after October 1 ceased operating their wireless apparatus on the wave length between 300 and 450 metres whenever they are within 250 miles of the coast of Canada, the United States and the British Isles. The purpose was to relieve radio broadcasting from a type of interference which has been an increasing cause for complaint.

Genuine Aspirin Proved Safe

Take without Fear as Told

in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Tablets of Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Cold, Headache, Neuritis, Lumbago, Toothache, Rheumatism, Neuralgia, Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Must Maintain Navy

If Great Britain were a continental power she could see her navy go with equal alacrity, but Great Britain is not England alone. It is South Africa. It is Australia. It is Canada. It is the Pacific. It is the Seven Seas. Take the Union Jack from the masthead of the British navy and it is goodbye to the Commonwealth. The British empire is the British fleet. If we are to preserve the one we must maintain the other.—London Daily Express.

In Salvador, Central America, oranges sell three for two cents.

SUNDAY SCHOOL LESSON

NOVEMBER 5

PAUL'S FAREWELL AT MILETUS

Golden Text: Ye ought to help the weak, and to remember the words of the Lord Jesus, that He Himself said, It is more blessed to give than to receive. Acts 20:35.

Lesson: Acts 20:1-38.

Devotional Reading: Psalm 126:1-6.

The Text Explained and Illumined

Paul Reviews His Ministry at Ephesus, verses 18-21. See The Historical Background. From Miletus Paul sent to Ephesus to ask the elders of the church there to come to meet him. In the churches which he founded Paul had established the office of deacons and had ordained elders after the model of the Jewish synagogue. Peter, in his Epistles, calls himself a fellow-elder; and Paul calls these church officials sometimes elders and sometimes bishops, using the latter term, which means literally overseers, or superintendents, in churches where the Gentile element was large.

When the Ephesian elders arrived, Paul began his talk by recalling to their minds his mode of life while among them. First of all he spoke of his "lowliness of mind." Humility was a remarkable virtue in Paul, for it was an uncommon one in his day. Fear of giving offense to the Jews and endangering his own life had not kept him from preaching a crucified Christ; the need for repentance and faith, and the gospel for Gentiles as well as Jews.

Introduced Shawl Into Europe

The shawl first was introduced into Europe at the time of Napoleon's return from Egypt, where he was fascinated by the alluring garments worn so lavishly by the Orientals. It is said that he bought for the Empress Josephine over four hundred of these shawls at one time, and that one of his caprices was that he should never see the same shawl upon her shoulders twice in succession.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Has Amazing Possibilities

Experiment at Wembley Suggests Wonderful Idea For Lighting

That was a remarkable experiment conducted by the post office section of the British Government. A crown, a replica of that in the Tower of London, studded with forty small electric bulbs, was kept lighted by an electric current thrown from a high-frequency generating circuit some distance away. The possibilities thus opened up are enormous and again reveal how constantly we are on the threshold of new discoveries. Before long it may be an everyday occurrence to draw electrical energy from the atmosphere that envelops the earth, nature's own laboratory. For the present this is a wireless age, and experimenters are penetrating deeply in that fascinating research, with their next advance possibly a lighting aerial. Indeed, a London writer thinks it possible that near future may find us obtaining electricity for lighting and heating and possibly cooling by an aerial on the roof connected with domestic switches. There are indeed more possibilities of that than usual in prophecy.

Prevent Grippe with Minard's Liniment

Illustrating Smallness Of Atom

To illustrate the infinitesimal size of an atom, Professor Niels Bohr told a meeting of Scandinavian mathematicians that to count the atoms contained in one cubic centimeter of air, all the peoples of the earth, white and negro, would have to count for more than 1,000 years and then their task would not be finished.

Conquers Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of healing for the afflicted. Systematic inhalation of smoke or fumes from the remedy prevents re-attacks and often effects a permanent cure.

Prevention of Disease. Medical science is stressing more and more the prevention of disease as against the cure of disease. But in nearly every case the science of prevention is little more than the science of food.

What medicine needs is less serum chemistry and more food chemistry, less hokum and more common sense.—Vancouver Sun.

An Essentially Canadian Industry, Fur Farming Is Developing At Rapid Rate, East And West

Fresh indication is continually being given of the remarkable manner in which Canada's newest industry, that of fur farming in its broadest conception, is seizing upon the popular imagination and enlisting fresh followers as well as periodically broadening the scope of its activities. With surprising frequency announcement is made of success attending the efforts to bring under domestication some new species of Canada's fauna, whilst a very gratifying number of individuals, visioning the future status of the industry and the profits to be derived therefrom, are going to join the swelling army of Canada's fur farmers. Governments anticipating the same possibilities and recognizing the wisdom of intelligent development and early stabilization are beginning to take steps for the encouragement of the industry and to put in effect measures for the relief and maintenance of a high standard.

Prince Edward Island has been progressive in this regard, as is natural in the birthplace of the industry. A research experimental station, with special reference to foxes, has been established through the co-operation of provincial and federal governments to prosecute work for the benefit of fox breeders all over the Dominion. Ontario, according to recent announcement, has given its official endorsement to fur farming in a very practical manner. It is to establish and operate a fur farm under expert supervision for the encouragement of the domestic rearing of all of the wild fur-bearing of the province. The aim of the government is to assist prospective fur farmers by educating them, creating a fund of valuable information for their use, and selling them really first-class stock for establishment. The provincial department of agriculture of Alberta has announced that it plans putting into operation a fur marketing service designed to meet the requirements of small operators for a medium of marketing, and which will not only serve the needs of trappers in the north, but those of Alberta's growing ranks of fur farmers.

Meanwhile signs of the expansion of the newer phases of the industry are to be observed on every hand. The popularity of muskrat farming has been almost sensational, and all over the country, sections of marshland previously considered worthless, are being transformed into profitable muskrat ranches. The industry of chincheilla rabbit fur, so recently inaugurated, promises likewise to reach considerable proportions. Establishments for raising this little animal, introduced from Europe and proven through experiments in Saskatchewan to thrive particularly well in the brisk Canadian climate and raise a richer, more valuable pelt there, are now to be found in Ontario and British Columbia.

On the Pacific coast, and in fact throughout Western Canada, fur farming is exhibiting a remarkable growth. Residents of that broad territory, getting away from the mainline conceptions of agriculture and entering more extensively into the gentler phases, have adopted the domestic rearing of fur-bearing with characteristic vigor and enthusiasm. On Vancouver Island, where less than eighteen months ago there were not half a dozen fur farms, there are today about forty. A similar popularity is to be observed throughout the prairie provinces.

Fur farming, as a broad, multi-phased activity developing out of fox farming, is an essentially Canadian industry whose era is but opening. Yet already, in expert opinion, its future is assured and it will in time become as staple as wheat growing, cattle raising or mixed farming. Fur production will slowly become revolutionized, and instead of the piles of rich pelts which go from the Dominion all over the world being brought in from the Arctic tundras, they will emanate from small, intensive fur farms, raised by men living under the pleasantest of social conditions.

Would Come To Canada

One hundred ex-servicemen from the East End of London, after having visited the Canadian and Australian pavilions at the British Empire Exhibition, passed a resolution urging the British Government to spend a portion of the date for the establishing of unemployed men in positions in the overseas dominions.

Lightning strikes oak trees most frequently, and after the oak comes the elm, chestnut and pine.

Being broadminded is all right. But there is a danger. Broad streams usually are very shallow.

W. N. D. 1601

Factors In Milk Contamination

Proper Procedure to Follow in Order to Produce Clean Milk

In the report of the comparatively recently organized division of bacteriology of the Dominion experimental farms, covering the year 1924, it is shown that the factors that stand out prominently in the contamination of milk are, first, carelessly cleaned pails, and, secondly, the health and cleanliness of the animal itself. Pails should be carefully cleaned and well dried. Care should also be taken to see that no dried manure particles get into the pail during milking. Dr. A. Grant Lochhead, the Dominion agricultural bacteriologist, who is responsible for the report, which can be had at no cost on application to the publication branch of the agricultural department, Ottawa, deals with other factors that are apt to cause milk contamination. Tests have been made at the central experimental farm to ascertain how the milk is affected and statistical tables are supplied showing to what degree milk may be contaminated by unsanitary conditions pertaining to the milker, beast, stable and utensils. A clean pail, a covered pail and a clean animal, remarks the doctor, are the big things in producing clean milk. A study is in addition given of bacteria producing a bitter flavor in milk, of the microbiology of frozen milk and of flax rotting. Cleanliness is next to godliness in agriculture the same as in other things.

Record Cattle Shipments

Canada's Revenue For 1925 From British Markets Over \$12,000,000

With the close of 1925, Canada's cattle shipments to the United Kingdom for the year will be considerably in excess of 100,000 head, constituting a record. The monthly average will be over 16,000. In money the year's total will be over the \$12,000,000 mark. These predictions are made by an Ottawa authority on the basis of a total of over \$2,000 head up to the 15th of October.

The British admiralty some time ago established control of certain wharves not then required for other purposes, so that there is no wharfage now available for the discharging of Canadian cattle.

In the near future it is hoped that success will crown the negotiations between the Canadian and British authorities for a highly specialized system of ocean cattle transportation that will reduce the cost and ensure regularity of delivery at British ports.

Record Movement Of Wheat

Grain Marketed on C.P.R. Lines at the Rate of Seventy-five Bushels Per Second

More than 102,083,763 bushels of wheat, 80 per cent. of which has graded contract, has been marketed in the prairie provinces during the month of September, according to railway reports. This is a record movement.

If all the wheat marketed during September along the Canadian Pacific Railway were hauled into bread and loaded on standard delivery wagons, each wagon containing one thousand loaves, and travelling at the rate of five miles per hour, it would take eight and a half weeks for these wagons to pass a given point. The marketing of grain on the C.P.R. in September amounted to 62,269,957 bushels. In twenty-five nine-hour working days this is at the rate of 75 bushels per second.

British Cattle Raisers Worried

Foot and Mouth Disease Has Again Broken Out

Cattle raisers are worried over a recurrence of the foot and mouth disease of several places in England. Scarcely had the minister of agriculture's withdrawal of the last restriction dealing with the disease been announced when an isolated outbreak was reported. Since then there have been several others.

The restrictions have been reimposed in some places, notably Manchester, where hundreds of cattle and sheep are brought in from Wales and Westmoreland and slaughtered. Under the restrictions, any sheep or cattle coming in must be immediately slaughtered.

Women are to be employed exclusively as announcers in the new broadcasting station in Tokyo, Japan.

After a woman reaches the age of 30 it is impossible to convince her that the good old die young.

Dairying Makes Progress

Nine New Creameries Established in Saskatchewan This Year

"That there is confidence in the future is shown by the fact that nine new creameries have been established in Saskatchewan this year. While the majority of these are in the northern and central portions of the province, three are situated in the south, in the heart of the grain growing section, where a few years ago dairying was not by any means considered an important branch of agriculture," said P. G. Kidd, dairy commissioner for the province.

In addition to the new creameries, five new cheese factories have been built and have commenced operations and two creamery companies have installed in their plants equipment for making cheese. As in the case of the creameries, the new cheese factories are situated in the districts ranging from the extreme north to the southern part of the province.

"It is worthy of note that most of them have been established at points from which a large quantity of cream was previously shipped. In this way some of the milk which was formerly sold as cream for buttermaking is now made into cheese."

Obstacles In Way

Of Walker's Plan

Canadian Director's Immigration Scheme Commented On By London Paper

The Nation, a London weekly, discusses the migration scheme of J. Bruce Walker, Canadian director of European migration, who recently, in outlining his programme for obtaining emigrants for the Dominion, suggested that centres might be set up in the United Kingdom for training in agriculture of the surplus of the unemployed and through these training centres 20,000 men could be absorbed in Canada within a year.

"If Bruce Walker should be justified in his undertaking all parties in England will rejoice," the Nation says, but the paper intimates that the carrying out of the scheme may not be so simple because of the Dominion's attitude as to the sort of immigrants desired.

"The Canadian Immigration authorities have been rigorously selective," the Nation continues, "and they certainly will not relax under the new system. Preference will necessarily be given to the best families from the land and to skilled artisans. In other words, the drain of Britain's best must be stimulated. For Canada no other policy is conceivable, but Bruce Walker's plan gives urgency to the need for a considered emigration policy for Great Britain."

See Danger In Liquor Traffic

Women doctors, lawyers and economists of Germany favor local option and see in the excessive use of alcohol one of the worst dangers confronting Germany. They held a joint conference, with delegates from the Association of German Women Physicians, the Federation of Women Lawyers and the Association of Women Economists, at the conclusion of which a resolution was adopted memorializing the Reichstag in favor of local option.

Only a few more weeks before winter is with us again. Better be looking up an old flame.

Health Of Our Livestock

Good Progress Has Been Made in the Control of Disease

There is much of a comforting nature in the report for 1924-25 of the health of animals branch of the department of agriculture at Ottawa. The veterinary director general, Dr. George Hinton, in reviewing the contagious disease situation in Canada shows that the animal diseases that a few years ago were troublesome have been banished from the country. Rabies has not been detected in any part of Canada for years. No outbreaks of dourine has been reported among breeding horses for five years, and there is every reason to believe the infection does not exist in this country. Only one outbreak of anthrax was reported in the year, and that was in British Columbia and was brought speedily under control. The maula is extremely rare in Canada. By vigorous action hog cholera has been practically eradicated. Suspected glands not being promptly reported in unprogressive settlements of Alberta and Saskatchewan, action has been necessary and has proved effective, but close supervision is being kept to prevent recurrence. Eastern Canada and Manitoba are free of the disease. Prince Edward Island, New Brunswick, Quebec and British Columbia are free from maula, but isolated cases are reported in Nova Scotia and Ontario. Manitoba, Saskatchewan and Alberta have had to have energetic attention, especially in the last-named province near the international boundary. All Canada has been practically free from sheep scab for many years.

Good progress is being made in the control of bovine tuberculosis. Live-stock breeders, says Dr. Hinton, are now commencing to realize that it is poor business to maintain diseased herds and to purchase animals from questionable sources. When the report was published there were 1,675 fully accredited tuberculosis-free herds in Canada and 2,100 undergoing the process of accreditation.

There is also a tuberculosis free area in the Carman district in Manitoba, which is being dealt with under the restricted area plan. All cattle in an area comprising the counties of Huntington, Chateaugay and Beauharnois in the province of Quebec have also been tested by veterinary inspectors and reactors destroyed. There is every reason to believe that this area will be a tuberculosis free area by the time the next annual report is issued.

The White Collar Job

The old idea that a white collar job at a low salary was better than an overall job at high wages has been abandoned pretty generally since the cost of food and clothes has advanced. Men, especially those with families, must have money, and they no longer feel that it is necessary to earn it in clean clothes. —New York Herald-Tribune.

Ephraim: "What you oil call it when a girl gets married three times—Bigotry."

Rastus: "Lawsy, boy, you suttinly an an' immoralous. 'Why, when a girl gets married two times, dat am bigotry; but when she gets married do third time, dat am trigonometry."

Birds hurt by sight. Beasts at prey depend upon the sense of smell.

Sugar Beet Cultivation May Prove A Great Factor In The Prosperity Of Western Canada

Making Progress In

Fight Against Rust

Saskatoon Scientists Make Further Discoveries in Complicated Struggle

The rust work carried on for some years at the University of Saskatchewan is assuming new phases in the plant breeding experiments conducted in the cereal breeding section of the field husbandry department.

The end in view is a wheat that will have all the good qualities of the best strain of Marquis wheat which will also be highly resistant to all the rust strains found in Canada. During the past season a large number of crossings were made with Marquis on a highly rust resistant strain of timothy. At Minnesota there has already been developed a highly rust resistant cross between Marquis and timothy, which is known as Marquis-timothy 41. This cross is of good quality, high yielding, combining in a high degree the milling qualities of Marquis, as well as the earliness and strength of straw, but the flour is too yellow to be satisfactory to the millers. It is hoped by back-crossing Marquis with Marquis-timothy 41 that a strain may be produced which will have the flour color of Marquis combined with the rust resistance and other desirable qualities of Marquis-timothy 41.

It will take many years and many hundreds of crosses together with careful selection and testing before the desired results are obtained. In undertaking these experiments the scientist in charge makes it very clear that he has no assurance that a high quality wheat immune to all rust strains may ever be discovered.

City and Country Co-operation

The City Should Work Actively For Rural Prosperity

Some years ago city people used to ridicule country people, and country people felt jealous of city dwellers. While much of this exchange of sentiment was fairly good natured, yet it often went so far as to create antagonisms that destroyed all co-operation. Today, the cities and country regions are discovering that they are interdependent. It is as absurd for city and country to quarrel, as for a merchant to quarrel with his customers, or for a business man to quarrel with his help. The time is fast coming when a city and the country around it will be considered an indivisible unit, with identical interests. The city will work actively for rural prosperity to increase its own business, and the rural people will work for the advance of their centre to provide a stronger support for their enterprises. —Salem News.

A Suggestion

Young Mistress.—What would you do, Marie, if you could play the piano like me?

Servant.—Oh, I should certainly take lessons.

Good Imitations are sometimes superior to poor originals.

The new million dollar beet sugar refinery of the Canadian Sugar Factors Ltd., at Raymond, in Southern Alberta, has started operations, resulting in the resumption of a sugar beet industry in that territory under much finer auspices. It is now evident that this new Alberta activity is away to a good start and, with the sureness of foundation, has great potentialities.

After exhaustive investigation and preparation United States interests entered the Southern Alberta field for the refining of sugar from beets in the spring of 1925. Promise was made to erect a sugar refinery at Raymond, in the heart of the irrigated districts. It farmers would contract for an acreage of 6,000 acres of beets. It is estimated that 7,200 acres have been signed up, and reports during the growing season were to the effect that stands were 90 per cent. perfect. The beet sugar crop in Southern Alberta, it is officially stated, is exceptionally good, and it would not be surprising if the tonnage produced reached 90,000 tons.

Such a successful year of inception opens up great possibilities for the sugar beet industry in Alberta and all Western Canada. The possibility of the industry from the agricultural standpoint in the area has never been in question, climate and soil being eminently suitable. Experimentation has proven an excess in both tonnage and sugar content in Southern Alberta production over that of the Western States.

Farmers in the area have become enthusiastic over the possibilities of the sugar beet and a much wider and more general interest has been created. Authoritative opinion has it that the acreage devoted to this crop next year will be 12,000 acres at least, and that by 1927 there would be sufficient beets grown in Southern Alberta to necessitate the erection of another factory. The same authority predicted a time when there would be seven sugar factories in the section to take care of the crop.

This is a very gratifying development of the year's agriculture in Western Canada, regarded directly and indirectly. Apart from the revenue derived from the actual sale of the beets, for which a ready market is assured, an improvement in the general agricultural situation of the beet growing districts is to be expected, from the development of a livestock industry and other phases, such as has been the experience of similar sectors in the United States. Authorities are confident that it will prove one of the greatest factors in the prosperity of Western Canada, and there is every opportunity for expansion of the industry there.

Trees Worth Three Million

New York Girl Finds Tree Farming Is Profitable

Trees cannot, it is true, be made by poets, but they can be nurtured with such loving care and skill by someone who has studied them and understands their needs that they more than repay that someone in beauty and economic value.

Miss Evelyn W. Smith, of Amawalk, N.Y., has so far extended her father's cherished hobby—tree farming—that her estate at the foot of the Berkshires holds 1,000,000 trees, worth about \$3,000,000. For sixteen years Miss Smith has worked at her tree culture with patience and enthusiasm until today her nurseries are visited by admiring tree lovers, landscape architects and college forest specialists interested in the results of her experience.

The sturdy, beautiful Amawalk trees are as much in demand for memorial purposes as for landscape decoration. Only a short time ago a beech was sent to Belgium to express by a living symbol the friendliness between the children of the two nations.

Getting Rid Of Farm Pests

More than a quarter of a million crows' eggs, crows' feet and gopher tails were gathered in the crow and gopher extermination competition carried on this season by the Manitoba department of agriculture. The exact numbers are: Crows' eggs, 175,519; crows' feet, 28,243; gopher tails, 47,153. The province has distributed \$2,150 in prize money.

The Equinox Myth

In days gone by mariners looked for storms in the week following the 20th of September, this being the vernal equinox. Now scientists tell us that it is no more likely to be stormy at this period than at any other time during the early fall. —Port Rowan News

FORT GARRY ORCHESTRA FOR RADIO

Radio fans in Western Canada and the Western States, who frequently expressed their appreciation of the studio dance music programmes from Station CNRW in the Fort Garry Hotel, Winnipeg, will this winter find a new orchestra catering to their enjoyment. Photograph shows the new Fort Garry Orchestra, headed by Mr. F.

A. Plumm, which has opened its winter engagement at this hotel, and which will be heard every Wednesday evening in both studio and dance selections from the new studio of CNRW, which is located in the Fort Garry Hotel. At Jasper Park Lodge during the summer months, Mr. Plumm's orchestra won the praise of hundreds of tourists, both Americans and

Canadians, who stated that in their travels to the various summer resorts on the continent, they had not found an orchestra which surpassed that of Jasper for either dance or concert numbers.

The Fort Garry Orchestra will broadcast every Wednesday evening, as it plays studio and dance numbers at the Fort Garry.

WORLD HAPPENINGS
BRIEFLY TOLD

The largest map in the world is being made at San Francisco. It is to be 600 feet long and 18 feet wide.

The largest carbon migration for twenty-five years was reported in the Copper River country, Alaska.

Britain's claim of 26 million pounds from Rumania on account of war debt has been scaled down to 10 million pounds.

The New York Times estimates the loss to the anthracite industry and three railroads by the strike of the anthracite miners, which began September 1, at \$165,000,000.

Manitoba's Government-owned telephone system is having a successful year. Total earnings for September were \$17,069.98, or nearly \$700 greater than August.

Foot and mouth disease among cattle is spreading in Lancashire, Eng., and two new outbreaks were reported recently. A large number of affected cattle have been destroyed.

The bylaw for the purchase of the Winnipeg Electric Railway for \$13,127,000 will not be submitted to the ratepayers at the civic election in November.

A public park is to be created by the territory of Hawaii at Kaulaekua, on the Kona coast. The park will include the monument of Captain James Cook, famous English navigator and explorer, and the 5,682 square feet of British territory which surrounds it.

Thirteen years ago 125,000 tons of traffic passed by the "Elephant and Castle," London, every year. Today the amount has increased to 155,000 tons. Traffic at Hyde Park Corner has grown from 99,000 tons in 1912 to 140,000.

A Cairo despatch to the Daily Mail says it is officially announced that Tut-Ankh-Amen's tomb was re-opened Oct. 12 in the presence of Egyptian officials. The lid of the sarcophagus was lifted, revealing another sarcophagus on which lay a thin linen cover and several bouquets of flowers in a good state of preservation.

Relics Of Ancient Mayas

Find of Explorer Are Now In British Museum

Relics of the ancient Maya civilization, to the number of about 200, which were unearthed recently by Mr. E. A. Mitchell-Hedges, the explorer in the hitherto unknown interior of British Honduras, are now in the British Museum in London.

Most of them are fragmentary examples of pottery. Among them is a miniature head of a smiling man which might have been modelled to-day, so strikingly "modern" is its spirit.

It appears from the character of his finds, however, that Mr. Mitchell-Hedges may well succeed in bringing to light data about the Mayas' lost civilization which may enable us at least to solve a great mystery, for the beginnings of the Mayas are rooted in mystery.

Among the finds he has brought to the museum is a potted dish which suggests that printing was not unknown to the Mayas, and it is certain that they produced pottery with moulds.

Factory Turns Out Speeches

Pennsylvania Firm Sold Three Million Last Year

A writer in a United States paper has received a circular from a Pennsylvania factory for the manufacture and sale of after-dinner and other speeches. Before receiving this he had no idea of the magnitude of the industry. The manufacturer announces it sold three million speeches in 1924 and confidently expects to double the output in 1925. The thought is appalling.

We hear much of free speech, but the company claims to have sold these productions at prices ranging from 2 1/2 cents to \$40 each. Blocks of five can be had for \$2, of ten for \$3, and twenty for \$5. As to their quality: "The data is accurate, the English clear, forceful and oratorical." What more could be wanted? If a set speech is not desired choice may be had of three hundred "snappy" stories, as many "toasts" for all occasions, plus one hundred ideas for entertainment committees. Twenty-five short prayers can also be had for 50 cents, to relieve anyone embarrassed by the call to "ask a blessing." The longest set want listed is "one hundred ways to introduce a speaker."

A Good Stayer

If the Turks who are trying to push John Bull out of Mosul were not "young Turks," they would probably know better than they seem to know that John is the champion sit-faster of the universe.—Boston Transcript.

W. N. U. 1601

Frailty Of Men Of Strength

It Is Found That the Strongest Frequently Die At Early Age

Twenty-five or thirty years ago Eugene Sandow was not only "the strongest man in the world," but he was unquestionably the finest specimen of physical manhood of his day and generation. Every boy who looked upon his much-photographed development longed to be like him. Now, at the age of 58, he is dead; the effects of an automobile accident some years ago are said to have hastened his end.

One week ago Sigmond Brothart, again "the strongest man in the world," who was touring Canada a few months ago, died quite suddenly. There was also John Marx, who was Sandow's immediate successor. He tore horseshoes in two with his naked hands, smashed chains with a blow of his fist, stood on a high trestle and with a harness on his shoulders lifted an elephant off the ground. He died of consumption in his early forties.

The hulking muscle man is generally the object of envy and admiration by other men. The envy is sometimes unwarranted. The so-called strong man is often a frail reed, and if he is not he frequently becomes one because he neglects tending the care of himself that a less powerful man would do.—Ex.

Phone Test Is Successful

Alberta Now Linked With United States and Eastern Canada

Inaugurating a direct telephone service that will link Alberta with many points in Canada and with every state in the American Union, Lieutenant-Governor R. G. Brett, in the office of Hon. V. W. Smith, minister of railways and telephones, engaged in telephonic conversations with the secretary of the state of Montana, of Colorado and of Arizona at the state capitals of Helena, Denver and Phoenix, exchanging greetings with the people across the line.

Premier Greenfield and other government officials were present during the test, which was a complete success as far as these three states were concerned. The test as originally planned also includes direct connection with Ottawa and Vancouver, but owing to a short circuit six miles south of Wetaskiwin, caused when the wires became entangled with the telephone lines, the latter calls had to be postponed.

Cold On Planet Mars

Scientists Believe That It Registers 100 Degrees Below Zero At Frequent Intervals

Mars may or may not be inhabited, but if so it is a life apparently enjoying anything but a warm and salubrious climate. With the use of an extraordinary delicate instrument he has invented for finding out such distant facts, W. W. Coblentz, of the bureau of standards, Washington, has concluded that the mean annual temperature of the surface of Mars is in the neighborhood of 20 degrees, Fahrenheit, comparing with the earth's 58 degrees.

The observations indicate that 100 degrees below zero can be encountered quite frequently on Mars. Most of Dr. Coblentz's work on the problem was done last August, when Mars came much closer to the earth than it does usually.

Must Have Just Settlement

Force Will Never Settle Chinese Issue Says N. W. Rowell

Addressing the Toronto Canadian Club at luncheon on the subject, "China and the Foreign Powers," Hon. N. W. Rowell, K.C., who has just returned from a tour of the Orient, declared that force will not settle the issue between China and the powers. A just settlement, he declared, while giving China autonomy in fixing its import tariffs and control over the trial of foreigners indicted for criminal offenses, must at the same time protect foreign trade interests in the country.

"The boycott in China against foreign, especially British goods," he said, "has been practically 100 per cent. effective, with the result that British trade there is at a standstill."

The First Potatoes

The potato plant is a native of Chili and Peru, South America. It is generally considered that potatoes were first brought to England from Santa Fe in tropical America, by Sir John Hawkins in 1565. Others ascribe their introduction to Sir Francis Drake in 1586. Their first culture in Ireland is referred to by Sir Walter Raleigh, who had large estates in County Cork.

Travel Note

The cabin of an ocean liner, says an insurance authority, is the safest place in the world, and a Pullman berth is next. Stay home if you must, but remember, you do it at your own risk.—Spokane Spokesman-Review.

ECLIPSE FASHIONS
Exclusive Patterns
by Hazel Bayne

Plaids Trim Distinctive Fall Dresses

Autumn silhouettes lend gracious lines to the woman of generous proportions. We suggest this simple model, that is the badge of good taste from its child collar down to its hem. Heavy flat crepe fashions this tailored frock having a group of four three-quarter-inch tucks, extending down either side of the front and back. The convertible collar may be worn buttoned high, or open with a becoming vestee set under the front. The sleeves may be long or short, and attractive shaped pockets are set onto the plaids. The diagram portrays the simple design of the partly finished frock. No. 1127 is in sizes 40, 42, 44, 46 and 48 inches bust. Size 42 bust requires 4 1/2 yards of 40-inch, or 3 1/2 yards of 51-inch material. Price 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of book 10 cents the copy.

Motor Car Maintenance

Are Now Half a Million Pleasure Cars In the Dominion

Advances made by the automobile industry since 1921 were dealt with by G. D. Finlayson, superintendent of insurance for the Dominion of Canada, in an address to the fifth annual convention of the Ontario Fire and Casualty Insurance Agents' Association at Toronto. The industry had increased by leaps and bounds within the past four years, and offered a field for insurance companies, according to Mr. Finlayson.

"The automobile has revolutionized our economies," stated Mr. Finlayson. "At the present time it is safe to say that there are 500,000 pleasure automobiles in Canada, and if we estimate the cost of maintenance at \$25 a month we would find \$150,000,000 is annually spent in this manner, or one-half of what the national debt was ten years ago."

Hungarian Settlers

Several Families From Hungary to Settle in Alberta

Baron Joseph Csavoszy and his brother Andre, who recently bought out a ranch in the Cochrane district, Alberta, will bring several families from their homeland in Hungary as settlers. These prospective immigrants will be brought in over Canadian Pacific Railway lines and will be supplied with improved tracts of land on the Csavoszy estate on their arrival.

Our Country

Canada is great. Canada is a land of which every man and every woman may be proud. Big things are ahead for our country. Let us be confident and determined, and success, glorious success, will be ours.—Border Cities Star.

The silver should study nature. Even lightning never strikes a locomotive.

The Proof of the Pudding

Big Wheat Yields Reported In Many Districts

It is an old saying that the proof of the pudding is in the eating. By the same logic, the proof of the opportunities which Canada offers to farm settlers is in the returns which farmers already in the country are getting for their labor and investment. While the statistics for the Dominion as a whole are impressive, they do not carry the same personal conviction as the example of what has been done by individual settlers. Hereunder are a few such examples as published in the newspapers in the districts in which the crops have been harvested. They tell their own story:

A big yield of wheat is reported from the farm of E. Rasmussen, Crooked Lake, Alberta. The crop averaged 45 bushels to the acre from a field of 41 acres. The wheat was the Red Bobs variety.—Edmonton, Alberta, Journal.

C. W. Johnstone, of Delaraine, Manitoba, threshed a crop of wheat this season that averaged about 45 bushels to the acre. The usual averages in this district are from 30 to 40 bushels per acre.—Portage la Prairie, Manitoba, Grahde.

The estimated average of wheat yields in the Aberdeen, Sask., district show records according to information received here. On some farms wheat has run from 40 to 45 bushels per acre on summerfallow. Oats have run up to 110 bushels to the acre, averaging 90 bushels per acre for the district around.—Saskatoon Star.

Drastic Reform In Turkey

Mystics of Islam Are Removed By Government Decree

One of the most drastic and far-reaching reforms in Turkish life has gone into effect almost unnoticed by the outside world.

The government's recent decree closing all monasteries in the republic has thrown out into the world some 20,000 Turkish monks and dervishes—mystics of Islam, who are totally untrained by education or equipment for any other pursuit in life.

The summary decree at the same time removed from Turkish life one of its strangest and weirdest classes, the dervishes.

These dervishes are divided into three categories—"hawling," "whirling" and "wandering." They live largely on the ignorance and superstition of the Turkish peasants, who have them to be invested with divine power.

Form "New Health Society"

British Organization Aims to Bring About Golden Age of Health

The London Daily Express says three former prime ministers of Great Britain, the Earl of Oxford and Asquith, the Earl of Balfour and Ramsay MacDonald, with a number of prominent physicians and hygienists, have formed a remarkable society aiming to bring about "a golden age of health" in England. This organization, which is to be formally inaugurated early in December, will be called the "New Health Society."

Its primary object will be the prevention of disease.

The promoters, according to The Daily Express, believe a "new race can be created by a new way of life."

A nation-wide propaganda campaign is to be launched when the society is inaugurated.

Likes Crossword Puzzles

Premier Baldwin Is Said to Be Devoted Follower of the Game

Premier Baldwin is a devoted follower of crossword puzzles. He discusses them with visiting statesmen, and one of his favorite tricks during a round-table conference dealing with security, debts or disarmament is to introduce a few remarks regarding knotty layouts of words. It is said, however, that Britain's leader always found difficulty in discovering puzzles sufficiently hard to give him a real tussle.

Our suggestion is that the prime minister learn the Russian language now that the craze is permeating parts of the land of the Soviet.

Dust Bath For Hens

Those who intend to have a winter dust bath must provide material for it ahead of freezing weather. The traditional value of road dust for this purpose is largely a myth, as ordinary earth is better and more easily obtained as a rule. Fowls like earth better than powdery road dust and it does not make the house so dusty when in use. Dry road dust is better than wet earth, however, as the latter will freeze and be unavailable when most needed.

It is reported that Washington will cut out the French war debt; will it then cut the British? If not, why not?—Kingston Standard.

Remove Tattoo Marks

Frenchman Claims to Have Discovered Formula For This Purpose

There is hope for the youth and maiden of yester year—sweethearts then, but strangers now. The little tattooed heart, pierced with a cupid's dart, pricked on arms as a sign of undying affection, can easily be removed.

The secret of the process for effacing the India ink became known through the arrest of Antoine, "the knife thrower," one of the most notorious apaches in Paris. When he was taken into the Berillon room for measurements, the police were surprised to find that two beautifully tattooed designs which formerly adorned his chest, had completely disappeared.

After long questioning Antoine modestly admitted that he had discovered a formula for removing the ink, which scientists had vainly been searching for. He was induced to part with the recipe, which is as follows:

"Pour upon the tattooed part a solution of essence of tannic acid. Then, with needles similar to those used in tattooing, inject the acid into the skin, making the needle pricks as close as possible to each other. Rub the part treated lightly with a crayon of minute of silver."

Antoine declared that the wound would heal in a sort of black thick crust which would disappear after two or three weeks, taking along with it the tattooed design. He said the entire operation was painless.

Canada's Best Cook

Toronto Woman Took Six First Prizes At National Exhibition

Who is Canada's best cook? According to the awards in this year's cooking contests at Toronto's National Exhibition, she is Mrs. J. Hamilton, 527 Windermere Avenue, Toronto.

Mrs. Hamilton's wins are as follows: Six first prizes for brown bread, milk buns, canned strawberries, canned raspberries, strawberry jam, orange marmalade. Her white bread came second and her cookies third. "Mrs. Hamilton's wins are a triumph for the farm woman's training for, though a resident of Toronto for 25 years, it was on her farm home near Owen Sound, that as Margaret Merchint, she learned how to cook."

A Memorable Year

In 1858 Canada adopted the decimal system of currency. In that year Queen Victoria selected Ottawa as the capital of United Canada, to become the capital of the Dominion nine years later. In the same year the Atlantic cable was laid between England and Nova Scotia.

Answer to Last Week's Puzzle

A Wembley Comedy

One Exhibit Made Very Realistic At Heavy Cost

One of the hundred thousand things to see at Wembley is an exhibit representing a grocer's shop in which cheese, oatmeal, bread, sugar and so on, are lying about with no wrapping. Dummy rats, mice and other small beasts are shown eating up the good things, and it is explained that this proves how important it is that food should be made up in properly-packed parcels before being exposed for sale.

But there are real rats and mice at Wembley, and one night they discovered the unwrapped food and did what the dummy rats were pretending to do—ate it all up, so that in the morning there was not a scrap left. They drove home the moral all right, but at rather too heavy a cost for repetition every day!

Made Difficult Ascent

Seventy-Year-Old English Woman Climbs Swiss Mountain

Miss Whiston, an English woman, long resident in Switzerland, has just broken every record for her age, 70, by climbing the towering mountain known as the Wetterhorn. She had no companion but her guides, and professes to feel no ill effects from her 12,000-foot tremendously difficult ascent.

The climb is one which demands very great endurance and no woman of whatever age ever before has accomplished it. Three, full of vigor of youth, have attempted it, but all failed, one losing her life.

Cattle Tuberculosis

Hon. W. R. Motherwell, minister of agriculture, has intimated that a conference of provincial governments and of municipalities, was to be called to devise a more active programme for the eradication of tuberculosis. The conference would be in furtherance of the steps taken by the department of agriculture in the establishment of tuberculosis-free areas for cattle.

It is a good idea to be frank, if you don't care what happens to your face

Damascus Is Still Seething With Discontent And Incipient Revolt

London.—A dispatch to the Evening News from Haifa, Palestine, says the situation in Damascus, where the French recently put down an insurrection, is still critical, while the surrounding country "is seething with discontent and incipient revolt."

French authorities are said to be imposing heavy fines on the city.

Owing to the Damascus insurgents' failure to deliver rifles in accordance with the terms laid down by the French, a fine of £10,000 was imposed on Monday.

Of the 3,000 rifles demanded, only 1,685 were delivered, and further fines of £500 must be paid each day until the last rifle is handed in, the correspondent reports.

The French guaranteed there would be no further bombardments, but barbed wire barriers have been erected in the streets to prevent ambushes.

The city is reported quiet, but with strong revolutionary undercurrents. The country to the north the dispatch says, is in a state of complete revolution. Telephone lines have been cut and motor cars are being held up within three miles of the city and the passengers robbed.

Strong bands of Damascenes are attacking and burning villages in revenge for the failure of their inhabitants to join in the firing against the French.

Toronto Honors

Robert J. Fleming

Street Traffic Suspended Two Minutes During Funeral Service

Toronto.—Toronto's street traffic ceased for two minutes and many people stood in the snowswept streets with bowed heads when the funeral service of one of the city's favorite sons, Robert J. Fleming, street railway magistrate, was held at the Timothy Eaton Memorial Church.

Seldom has the city of Toronto witnessed such general demonstration of mourning in connection with the death of one of its citizens.

From 12.30 to 2.30 o'clock the body lay in state at the church, and hundreds of people passed to pay their last respects.

The body was interred in Mount Pleasant cemetery.

Destruction In Damascus

U. S. Consul Presents Demands For Redress To French Authorities

London.—A Jerusalem dispatch to the Daily Telegraph says that homes of American residents and buildings of American companies in Damascus were destroyed during the insurrection of October 18 to 21, and that the United States consul has presented a demand for redress to the French authorities.

The dispatch also says a large part of the Jewish quarter of Damascus was destroyed.

"All Syria is reported to be aflame with discontent," the dispatch continues, "and this may be the beginning of a new war of Islam against the Christian powers. No one knows where the next attack may occur."

Newspaperman Elected

Regina.—C. R. McIntosh, of North Battleford, the successful Liberal candidate, is the only newspaper editor elected from the west. He is the publisher of the North Battleford News and has served several terms as president of the Saskatchewan Press Association, and has been a member of the executive of the Saskatchewan branch of the Canadian Weekly Newspaper Association since its formation.

Demands To Be Made Upon British Govt. For Home Rule For India

Delhi, India.—A movement to formulate "Constitutional demands for the native states of India," which is likely to affect the whole trend towards self-government, will be in the limelight shortly when a conference is to be held in Delhi under the presidency of N. C. Kelkar, a prominent leader of the Swarajists or Home Rulers.

Definite demands upon the British Government are being formulated in connection with the coming conference, it is understood, and it is said the demands will include the following:

RT. HON. W. L. MCKENZIE KING
The Liberal Chief

Disastrous Blaze In New Brunswick Village

Fourth In Four Years To Damage Business Section

Peticodiac, N.B.—Fire for the fourth time in the last four years swept through a portion of the business section of this village and caused damage estimated at more than \$10,000, in spite of efforts of the volunteer fire force with buckets and hand pumps.

The fire, the origin of which is unknown, burned to the ground five stores and three houses and scorched several other buildings including a hotel and two more stores.

The blaze raises the total of fire loss in the village to nearly half a million dollars in the last few years and each time it was the business section which was hit. Some of the structures burned have been built, several times within a few years and were modern structures.

Woman Wins Architects' Prize

British Student Had Competitors From Canadian Universities

London, Eng.—Miss Frances Silcock, of Liverpool University School of Architecture, has been awarded the medal given annually by the Royal Institute of British Architects for the best work done by any student of a recognized school of architecture in Great Britain or the dominions. Among the competitors were a number from Toronto and McGill Universities.

Miss Silcock, who lives at Highton, near Liverpool, is already acting as qualified assistant to an architect in the Mersey city, and intends eventually to practice on her own account.

Challenges Court Jurisdiction

Col. Mitchell Says Court Martial Has No Authority To Try Case

Washington.—After having secured the retirement of three members of the court martial chosen to try him, Col. William Mitchell challenged the jurisdiction of the court.

The colonel pleaded that the allegations against him did not constitute any offence falling properly under the articles of war, and that a court martial therefore was without authority to try the case.

Debaters Defeat Oxford

Philadelphia, Pa.—Upholding the affirmative of the question, "Resolved, that this house favors the principle of prohibition," University of Pennsylvania debating team defeated Oxford University.

Advocate Germicide Surgery

Use Amply Justified Says American College of Surgeons

Philadelphia.—A movement that may result in the abolition of the use of the knife in all minor and some major operations was started at the fifteenth annual congress of the American College of Surgeons.

The board of regents of the college decided to inaugurate at the centennial of the birth of Lord Lister, organizer of antiseptic and germicidal surgery, next April, a campaign of research and propaganda for the development and more universal use of those germicides which attack diseased cells in the body without destroying healthy tissues. The board resolved that the use of such germicides instead of the knife had already been amply justified, and also that the profession should know more about the new technique.

If a man had an internal abscess, speakers said, the only treatment had been the knife. It was pointed out that a germicide had been discovered which would destroy the abscess cells and leave the living tissues unharmed.

Statement Of Trade Very Encouraging

Report Shows Large Increase In Canada's Exports

Ottawa.—Canada's exports for the 12 months ended September 30 show an increase of \$84,827,169 in value as contrasted with a similar period ended September 30, 1924.

Canadian imports for the year ended September 30 also show an increase of \$26,457,239 as compared with the corresponding period ended September 30, 1924.

Total exports from Canada according to a report just issued by the Dominion bureau of statistics for the 12 months ending September 30, totalled \$1,155,290,739, as against \$1,073,463,570 for the corresponding period ended September 30, 1924. Total imports for the year ended September 30 last were valued at \$852,623,241 the report shows against \$826,166,062 for the same period ended September 30, 1924.

Manitoba Feeder Show

Entries Approximately Double That of Last Year

Winnipeg.—With an entry list approximately double that of last year, the third annual Manitoba stocker and feeder show was opened here.

The Pelican Indian agency at Brochet, Alta., captured first place in the three-year-old earlot class. Balcovski and Finkelstein, of Ronolane, Alta., however, captured the bulk of the awards in this division, taking second, third, fourth and fifth. They also won second for the two-year-old group of five. James D. McGregor, of Brandon, Man., won in the yearlings and calf class, while second place for yearlings went to the Lloydminster Co-operative Association.

Good Season For Whalers

Seattle.—With a season's take of 10,000 barrels of whale oil from Bering Sea, off the coast of Northeastern Siberia, the steamer Kommandoren I, mother ship of the Vega Whaling Company, of Sandefjord, Norway, accompanied by four steam whalers, has arrived here. The fleet, the first in several years to hunt whales off the Siberian coast, operated under a concession from the Russian Government.

Motors Cause Loss To Railways

Chicago, Ill.—Losses to railways caused by motor competition are permanent, and will be multiplied with the completion of road building programmes, W. B. Baldwin, president of the Missouri Pacific, testified before the inter-state commerce commission.

New French Cabinet

Name of M. Caillaux Does Not Appear In The List

Paris.—Premier Painleve has succeeded in completing a cabinet which is satisfactory to everybody. M. Painleve takes over the portfolio of minister of finance. Aristide Briand retains the post of foreign minister. Other portfolios were distributed as follows:

Minister of Justice—M. Chantemps.
Minister of the Interior—M. Schrameck.

Minister of Works—M. De Monzie.

Minister of War—M. Daladier.

Minister of Marine—Emile Borel.

Minister of Commerce—M. Chautmet.

Minister of Agriculture—Jean Durand.

Minister of Instruction—M. Delphes.

Minister of the Colonies—Paul Morel.

Minister of Labor—M. Duraufour.

Minister of Pensions—M. Antieron.

The under-secretaries are understood not to have been changed, and the new combination tends slightly more to the left than the former cabinet.

It is significant that the name of M. Caillaux, minister of finance in the cabinet just dissolved, and the man who precipitated the present crisis because of his proposals on debt adjustment and currency devaluation, does not appear in the new ministerial list.

May Be Message From Wrecked Coaster

Found In Bottle Off Wark Island October 24

Vancouver.—What may prove to be a message from men who died at sea nearly a year ago was picked up off Wark Island, Graham Beach, October 24.

D. Corilla, of Butedale, which is Graham Beach, found a bottle containing a message purporting to come from the last coaster Haysport Number 2, which disappeared with all hands in Mill Bank Sound during a storm on January 28, 1925.

The ship was proceeding north with a cargo of explosives for one of the northern mines with four men on board, Captain Partington, Mate Addison, Engineer Polley and a deck hand named Wood. She was last sighted in the storm heading to sea. Later, some wreckage was picked up, but no sign of the ship herself. And none of the bodies of those on board was ever recovered.

Mr. Corilla reported that the note reads: "We are wrecked at Mill Bank Sound. No escape from drowning. (Signed) Steamer Haysport."

Noted Canadian Artist Dies

John Colin Forbes Painted Many Distinguished Public Men

Toronto.—Following a lengthy illness, John Colin Forbes, R.C.A., is dead in his 79th year.

During his lifetime he has been one of the most distinguished of Canadian artists. His specialty was in portraiture, and in his time Mr. Forbes painted some of the most distinguished public men in Canada and Great Britain.

He also had the honor of painting the late King Edward and Queen Alexandra, under commission from the Canadian Government.

Hugo Stinnes Son Comes To U. S.

Berlin.—Tired of family quarrels and squabbles with bankers and receivers of the remnants of the family fortunes, Dr. Edmund Stinnes, eldest son of the late Hugo Stinnes, industrial magnate, has secretly embarked for the United States. His unexpected departure, friends say, represents a determination by young Stinnes to seek a new business environment.

Political Stalemate As A Result Of The Close Vote In General Elections

RT. HON. ARTHUR MEIGHEN
Leader of the Conservative Party

Canada Not Involved In Wembley Deficit

Dominion Provided Her Part and Paid For It

London.—The Duke of York presided at a farewell dinner given by the British Empire Exhibition commissioners for the dominions and colonies to the exhibition board and administrative staff.

The Duke of York, responding to a toast to His Royal Highness as president of the British Empire Exhibition this year, said the dominions, colonies, protectorates and mandated territories had proved in connection with the exhibition that there was little or nothing that could not be produced within the empire.

This statement was greeted with cheers.

While the guarantors of the British Empire Exhibition at Wembley are expected to have to find 75 per cent. of their guarantee, that is, 15 shillings for every £1 guaranteed, no liability will attach to Canada in the matter of any deficit in connection with the big show. Canada simply provided her own part of the exhibition and paid for it—practically out of hand. At least she has involved herself in no further liability than that connected with the Canadian Pavilion at Wembley.

Complete Extension To Plant

Saskatoon.—"While we would not care to commit ourselves to a definite statement right away, we would not have bought property to provide for an extension of the present plant had the extension not been contemplated," said Thomas Reynolds, local manager for the Quaker Oats Company, when questioned as to the possibility of an extension to the company's plant this year.

Australia's Wheat Yield

Adelaide, Australia.—South Australia's wheat yield for the 1925-26 season is estimated at 22,964,000 bushels, an average of 33.10 bushels an acre and an increase of two million bushels from the previous season.

Conservatives Will Have Largest Single Group In The Next House

Ottawa.—Canada's general election, two going to independent candidates, ends with Mr. Arthur Meighen, Conservative leader, as head of the largest group in the next House of Commons. The returns showed 116 Conservatives, 100 Liberals, 22 Progressives, 2 Independents, 2 Labor and 3 doubtful. Eight members of the cabinet went under. They were: Premier King; Hon. W. E. Foster, minister without portfolio; Hon. James M. Murdoch, minister of labor; Hon. G. N. Gordon, minister of immigration; Hon. G. P. Graham, minister of railways; Hon. Vincent Massey, member without portfolio; Hon. T. A. Low, minister of trade and commerce; Hon. J. E. Sinclair, minister without portfolio.

In the Maritime Provinces and in Ontario, Conservatives gained heavily. But the expected inroad into the Liberal stronghold of Quebec—on which Conservatives had counted—did not materialize. Hon. E. L. Patenaude, leader of the Independent-Conservative movement in that province, was himself defeated. Out of the 65 seats in Quebec, Conservatives only captured four, the Liberals holding 59 and

In the three prairie provinces four years ago, no Conservatives were returned. Manitoba has now elected 6 Commons. The returns showed 116 Conservatives, 100 Liberals, 22 Progressives, 2 Independents, 2 Labor and 3 doubtful. Eight members of the cabinet went under. They were: Premier King; Hon. W. E. Foster, minister without portfolio; Hon. James M. Murdoch, minister of labor; Hon. G. N. Gordon, minister of immigration; Hon. G. P. Graham, minister of railways; Hon. Vincent Massey, member without portfolio; Hon. T. A. Low, minister of trade and commerce; Hon. J. E. Sinclair, minister without portfolio.

The next parliament will see the return of some once familiar figures. Hon. Robert Rogers, formerly minister of public works in the Conservative Government of Sir Robert Borden, will be back. Mr. Rogers defeated ex-Premier Norris at Manitoba. During his western tour, Premier King announced his intention of taking Mr. Norris into his cabinet should he be elected. Sir George Perley, also a former Conservative minister and high commissioner in London during the war, is back. He was the only Conservative elected in the province of Quebec outside the Island of Montreal.

There were four women who stood for election, but Miss Agnes MacPhail will again be the only woman member of Canada's Parliament.

A Breaded Scourge

1918 Influenza Epidemic Took Toll Of 20 Millions

New census figures show the mortality of the influenza epidemic of 1918 throughout the world was nearly 20,000,000, the worst catastrophe of the sort since the black death of the middle ages. Dr. E. O. Jordan, bacteriologist of the University of Chicago, told the American Public Health Association at St. Louis.

"And if influenza were to descend upon us again tomorrow," he continued, "we should as public health workers and students of the disease, be little if at all better equipped to deal with it than we were seven years ago."

Practical difficulties in the way of administering efficient vaccination on a world-wide scale seem insuperable, he said. Face masks have only a limited applicability. Chlorine and similar gases have not proved of desirable prophylactic value.

"I believe, however, that something can be done to lower the attack rate in favorably situated small groups of individuals, and to lessen the virulence on the part of the necessary microbes," he said.

"The minimizing of contact seems at present to offer the best chance we have of controlling the ravages of influenza. Judging by the past nothing is more certain than that we shall some day have another visitation of this destructive infection. There are lines of direct investigation which can be prosecuted today with some hope of rendering ourselves better prepared to cope with the next epidemic."

Negro Progress

Cultivated Negroes Receive Prizes For Art and Literature

Some notion of the progress that cultivated negroes are making may be gathered from the recent award of the Army Spingarn prizes for art and literature. Seven hundred negro writers and artists competed—a number that contains the names of novelists, dramatists, short story writers, poets and painters of much originality and power.

The award for the best play, "The Broken Halo," went to Willis Richardson, of Washington, D.C.; for the best story, "High Yaller," to Dr. Rudolph Fisher, also of Washington; for the best essay to Marieta O. Bonner, of Massachusetts; "On Being Young—A Woman—and Colored," and E. A. Harleston, of South Carolina, won the prize for the best illustration.—*Emporia Gazette.*

Prize Winning Animals

The Lamb Fair Impresses the Value of Quality

It has not been unusual in the past to hear even farmers refer to prize winning animals at the larger fairs as "fancy stock." The lamb fair, a development of policies operated by the federal livestock branch, is helping to correct this mistaken view in showing as it does that the most perfect sheep as seen in the show ring is most valuable both from the standpoint of marketing and economy of production. Many sheep raisers are having impressed upon them as never before that the profit that may be obtained from the flock bears a close relationship to the quality of the breeding stock and therefore of their produce. The lamb fair is proving the economy of the better sire, and it is becoming easier each year for the owners of pure-bred flocks to find ready sale for their first-rate rams.

Unseemly Noises

The modern automobile horn is at its worst a loud mouthed, ruffianly sort of thing. It speaks in exceedingly ungentlemanly tones. It shrieks, whistles, roars or blares as it sees fit, reckless of the outraged ears of the neighborhood. It is a well meant device of our twentieth century civilization which in actual use angers and fatigues its hearers.—*Providence Journal*

Sheep Buying Plan

A scheme, whereby farmers in British Columbia may procure sheep, is proposed by Hon. E. D. Barrow, minister of agriculture for British Columbia. Under this scheme, large flocks of sheep would be purchased in the United States and sold to small holders and farmers, who would be able to get from 25 to 200, according to their requirements. All sheep purchased would be grade.

Keeping Them On the Farm

The New York Herald-Tribune contends that "nothing holds the boy or girl on the farm like an interest in livestock." Hereabouts, on the contrary, parents are only able to hold their young folk on the farm by giving them an automobile in which to get away from it.—*St. Catharines Standard.*

W. N. C. 1601

A Giant Generator

Continuous Current of 600,000 Volts Developed For Machine In France

A generator capable of furnishing a continuous current of 600,000 volts—the highest tension now known in the world—has been constructed by two French scientists and will be placed in the laboratory of the Sorbonne.

With this machine, its builders believe, it will be possible to attack the atom, breaking down its radioactive particles, as never before, and if the experiments are successful it may prove the forerunner of even more powerful generators. French scientists, in fact, are hoping to develop a current of 5,000,000 volts with which they think it would be possible to disintegrate matter artificially.

Speaking of the new generator, the writer, Jean Cabrejets, a well-known scientist, says:

"There already are transformers capable of raising the tension to 2,000,000 volts, but with these the current is alternate and, moreover, these appliances are to be found not in laboratories, but established in special industries. The laboratory, contrary to industry, demands a current which is continuous.

"The Crookes ampoule in particular, which produces the X-rays, is fed by a continuous current, and the tension of this current depends the intensity of the rays; in other words, the length of the wave.

"The higher the tension the shorter is the wave of these rays. Medical men believe more and more in the efficacy of ultra intense rays in the treatment of cancer.

"Until now their appliances have been capable of no more than 250,000 volts, and Paris can claim only one of these instruments among its hospitals. But the constructors of this new apparatus of 600,000 volts intend to reproduce it in large numbers."

Inoculating Alfalfa

Necessary to Inoculate the Seed of Alfalfa Before Seeding

When alfalfa is to be sown on land on which neither it nor sweet clover has been grown before, it is necessary to inoculate the seed before seeding in order to supply the young plants with the bacteria which are capable of extracting free nitrogen from the air. A new bulletin on "Alfalfa in Manitoba," distributed by the publications branch, department of agriculture, Ottawa, tells how this inoculating is done. The proper culture for artificial inoculation may be obtained, free of charge, from the Dominion bacteriologist, central experimental farm.

Another way of inoculating is to broadcast previous to seeding down, soil from the top 5 to 6 inches of an old alfalfa field, at the rate of from 100 to 200 pounds per acre. This method, however, requires considerable labor and may be the means of spreading weeds.

Agricultural College Near Arctic Circle

Opens Fourth Year With Fifty-four Students Enrolled

The Alaska Agricultural College and School of Mines in Fairbanks, located 100 miles from the Arctic Circle, opened its fourth year with an enrollment of 51. More than 150 students are expected by February. Last year 69 attended.

The Fairbanks College was founded September 13, 1922. A faculty of 14 was required this season, compared to half that many the first year. Charles Ernest Bunnell, former federal judge of Fairbanks, is president of the college.

Courses include agriculture, civil engineering, mathematics, mining, metallurgy, geology, mineralogy, English, French and business administration. Gymnastic training was offered this year.

Time Work

"What are you feeding to those hogs, my friend?" the professor asked. "Corn, professor," the grizzled old farmer, who knew the learned gentleman by sight replied.

"Are you feeding it wet or dry?" "Dry."

"Don't you know if you feed it wet the hogs can digest it in one-half the time?"

The farmer gave him a quizzical look. "Now see here, professor," he said, "How much do you calculate a hog's time is worth?"

Refuses Offers For Old Bible

After many peregrinations the famous Gutenberg Bible, printed by John Gutenberg from wooden type in 1456, has reached England and is the property of Edward Goldston. Tempting offers for the Bible have been made by American collectors, but Goldston says the Bible will remain in England.

Let Things Slide

Fortune Teller: You have a tendency to let things slide.

Young Mac: Correct! I play the trombone

Gave Famous German Inventor His Start

Dr. Gustaf Dalen At Fourteen Rigged Up Clever Contrivance

Difficultly in awakening and his fondness for a cup of hot coffee in bed, were two factors that led Dr. Gustaf Dalen, winner of the 1912 Nobel prize, to become a successful inventor.

Dr. Dalen as a boy, living in a humble country home, was required to awake early, but he found it hard to awaken on time. A discarded old wall-clock was repaired to which was added an alarm mechanism with a piece of tinplate taking the place of the bell. He combined the clockwork with a little friction wheel covered with emery paper that began to rotate 15 minutes before the alarm went off. Friction against the rough surface of the paper lighted a match.

The match was attached to a rod that swung over a gasoline lamp, the cap of which was simultaneously removed by another contrivance constructed from a couple of empty wooden spoons and a piece of string. Over the lamp he had placed a coffee urn containing coffee prepared the night before. When the slumbers of the little inventor, then 13 years of age, were interrupted by the alarm going off the room was lighted and his coffee was boiling.

It was during Dr. Dalen's experiments with gas accumulators for beacon lights that he lost his sight through an explosion. His inventive genius, however, did not seem to suffer as he has since given the world a number of new inventions and still continues to direct the work of his plant in spite of his blindness.

Density Of the Atmosphere

Thickest Near Earth, Decreasing Rapidly in Higher Altitudes

The best available evidence shows that practically all of the atmosphere is confined to a shell extending outward from the earth not more than 200 miles.

Even at a distance of fifty miles above the earth the quantity of air is believed to be almost inappreciable. The density of the atmosphere decreases rapidly as altitude increases.

If the atmosphere were at the present sea level density from bottom to top, it would all be contained within five miles of the earth. One-half of the mass of the atmosphere is within three and one-half miles of the surface of the earth, three-fourths is below the seven-mile level and seven eighths is below the ten-mile level.

Thus the solid earth has but a thin coating of air—only about one-fourth as thick as the diameter of the earth at its greatest; or, if we consider the atmosphere only in its appreciable extent (about forty miles above the earth), only about one two-hundredth as thick as the diameter of the earth—a mere coating not thicker, relatively speaking, than the skin of an apple of ordinary size.

Titled Typists Do Well

Have Entered Ranks of London's Business Affairs and Have Made Good

Titled typists have appeared recently in the ranks of London's business affairs, and, all reports say, have made good in every respect. The latest to take up a commercial career is Lady Constance Howard, sister of Lord Carlisle, who not long ago cutured the service of a well-known firm as a stenographer and secretary to the manager. Lady Constance says she likes the work immensely and the task itself is much less arduous than the training she underwent to make herself an expert at shorthand and typewriting.

Chinese Relics In British Museum

Dainty Bag of Diamonds and Silk 1800 Years Old

Some extraordinary things made long ago in China have been attracting many visitors to the British Museum.

One is a wonderful collection of ancient relics of magical delicacy and loveliness. There is a bag composed of little diamonds and blue silks as dainty as any a modern woman might carry, though Sir Aurel Stein says its age must be about 1800 years.

A small bag buried with some Chinese traveller about the time of Julius Caesar is only an inch long.

Not less wonderful is a case of well-preserved pastry which was prepared in China some 1300 years ago.

Cat-Bear Has Queer Coloring

There is a cat-bear, or panda—to give him his correct name—in the small mammals house in the Zoological Gardens in London.

His fur is brown—so dark as to be almost black—to the top of his thick-set legs; but the rest of him, save for his large white ears, and the lining of white on his face, is a brilliant orange.

Secondhand newspapers find a ready sale in the smaller villages of China.

Care Of The Greenhouse

Careful Watch on Insect Pests Is Of Prime Importance

The growing of vegetables and flowers under glass has become an industry of great importance. It is estimated that there is about six million square feet of space under glass in Canada devoted to the growing of these crops which are valued up to about three million dollars per year. These crops are subject to numerous insects, the ravages of which entail heavy losses. It was to reduce these as far as possible that the bulletin entitled "Insects Affecting Greenhouse Plants" was prepared by Dominion Entomologist Arthur Gibson, and his assistant W. A. Ross. As the authors say, much of this loss may be avoided if growers adopt the remedies that are recommended in the bulletin, which is freely obtainable by application to the Publications Branch, Department of Agriculture, Ottawa. How prolific and consequently how destructive these insects may become is illustrated by the fact that scientists have estimated that if all the progeny of a single aphid were to survive they would in 300 days be equal in weight to the teeming population of China seven fold. General recommendations given in the bulletin are as follows:

Working among his plants the grower should keep careful watch for any insect pest before they become destructive and have time to spread.

Handpicking for leaf-eating caterpillars should be practiced wherever possible and infected material burned or otherwise ruthlessly destroyed.

Weeds should be rigidly kept down. In selecting soil see that it is free from insects, such as cutworms, white grubs and wireworms. If there is reason to believe the soil or manure introduced is infected, sterilize it before planting.

Examine carefully any new stock imported. Rotation is often advisable. The common white fly, for instance, very injurious to tomato, primrose and other plants, and if new locations are used for such crops control of the insect will be easier.

Observe how the insects feed, as by no doing the proper remedy to apply will be better revealed. If the insect be a biting one, such as caterpillars, a stomach poison, such as arsenate of lead, is usually applicable; if a sucking one, which gets its food by their beaks, such as aphids, scale insects, etc., other insecticides are recommended, such, for instance, says the bulletin, as preparations containing tobacco.

Keep the greenhouse clean and burn all rubbish. Alabaster Lamps Not New Used By Egyptians 3,275 Years Ago Says Howard Carter

Whereas the world is just beginning to use alabaster for electric lighting, the Egyptians 3,275 years ago made even finer alabaster lamps than are produced today, Howard Carter, co-discoverer of Tutankhamen's tomb said in an address at London.

Mr. Carter made known that in finding many of these lamps in the tomb the secret of how the Egyptians illuminated their homes was revealed.

The lamps were executed in beautiful designs in translucent alabaster, and one of them stood about three feet in height, with a large central cup. There was no decoration on the exterior or the interior, but immediately a light was placed in the vessel there could be seen a picture of the young king and queen in colors. This effect was produced by another vessel, with the decoration on its exterior, being fitted inside the lamp so cleverly that the joints between the two vessels could not be seen.

A Small Fee

A famous London barrister whose fees amount to something like \$300,000 a year recently conducted a long and difficult case for a remuneration of less than fifty cents a day. This was in accordance with an old English custom by which any unemployed prisoner is entitled on his appearance in the dock to select any one of the barristers in court to conduct his case.

Looking For Business

"When people ask me how I find business, I tell them by looking for it." The fellow who says he can't find business is like the guy that takes a milk pail into the pasture and waits for the cow to buck up to it. If you want milk go after the cow. She's willing.

Plants exposed to electric light at night are said to grow twice as fast as when exposed to daylight alone.

Saving is a fine habit. But be careful what you save. Don't try to save all your good deeds for the future.

English Meaning Is Different

Canadian Woman Was Pleased at Being Called a "Nut"

A Canadian woman who had just arrived in London, Eng., having dressed for dinner with considered care, was greeted by her English cousin with the exclamation: "Isn't she a nut!" while a number of friends present nodded a smiling assent. The lady was too much surprised for a moment to think of anything witty to say. "Certainly it seemed to her that in an effort to make her feel at home her English relatives were joking rather than she might be going to find their sense of humor a trifle difficult.

Two evenings later she came downstairs ready for the theatre. Before leaving her room she had snatched herself that she looked rather well. A white lace evening dress with an old gold opera cloak had seemed to her a pleasant combination. It was another cousin this time who exclaimed at sight of her: "Oh, I say, but isn't she a nut!"

The pleasant lady had repeated itself. But this time something in the smile of the gentleman addressing her, and an unmistakable accent of approval without, made her thoughtful. She decided to wait with an open mind, as it were, for the next occasion on which she might be called a nut. Discovery followed fairly soon, with liberal forgiveness on her part. For in England where a cane is a stick, a yard a cement enclosure and knickers are distinct from plus-fours, a "nut" has a meaning far removed from the "poor nut" of an American parlance. There a nut is a dandy, a dude, somebody "all dolled up." It is more usually applied to a well-turned-out gentleman, however, than to a lady. And sometimes they spell it with a "K"—KNUT, with the "K" silent.

More Railways For Transvaal

South Africa Has Now Nearly 12,000 Miles In Use

If the long lost Randfontein gold reef has been discovered, as has been reported, it will result in a new rush to the Transvaal region and a further extension of South African railways. The country is filling up so rapidly that it has already been found necessary to build many connecting lines. The first set of a two-mile road from Durban was turned in 1860; now South Africa has nearly 12,000 miles in use, the second largest mileage in the world under a single management.

There has been an amazing growth in construction since the Boer War. Before that the railways terminated abruptly at the frontiers of the Dutch republics; but the gold and diamond discoveries practically forced additional construction, just as they had been a cause of the conflict between the Dutch settlers and the English. After the Jameson raid, lines were built ahead of settlement, and events have justified their construction.

Cultivation has already progressed fifty miles beyond the proposed rail-head at Beestekraal, so that a further extension will soon be required. Thus the frontier of civilization is being rapidly pushed northward in South Africa.

Cleaning Valuable Rugs

Oriental Have Two Simple Methods Which They Always Follow

The Oriental owner of valuable rugs has two very simple methods of cleaning them. Sometimes he takes a rug and lays it face downwards, and leaves it so for perhaps a week, treading and walking on it as usual, the dirt thereby gradually shaking off to the floor. He then turns it face upwards, gives it a good brushing, but one way only, the "way of the plic," the same as you would brush velvet. This treatment occasionally, and the daily brush, always remembering the "one way only," is all he does to the rug, and it is pretty long-lived as a result.

Regrimed or grubby looking rugs which are not too large he will wash even, but it is only the well-made, good vegetable-color dyed wool ones he treats in this manner. And he does not do it unless they really need it.

After the squirrel had married a couple who had come from the country the bridegroom inquired: "What do I owe you, sir?"

"The law," replied the squirrel, "allows me two dollars."

"All right, said the bridegroom, "I'll give you one dollar and then you'll have three dollars."

The doctor had just returned from a month's winter-sporting in Switzerland. "And did you do much sleighing while you were away?" questioned one of his garrulous splutter patients. "Oh, no," explained the medico, "it was purely a holiday trip."

Eating corn on the cob and still maintaining a semblance of dignity is not one of the few things that man does well.

Axminster Wheat

Samuel Lacombe Has Developed a New Variety of Rust Resisting Wheat With Great Possibilities

Since 1916, Samuel Lacombe, of Birtle, Manitoba, who has won so many laurels in the field of agriculture, has been devoting his time and energy to the discovery of a wheat equal in milling value to Red Fife and Marquis and resistant to the ever-increasing plague of black stem rust.

This wheat is the result of selecting and hybridizing seven lines, and in 1921 showed less than 5 per cent. of rust infection when Marquis and other varieties, growing within five feet of it, were infected 100 per cent.

This year it has done even better. Mr. Lacombe seeded it also by side with Marquis; Dr. Saunders early Red Fife and Kola. These wheats were all seeded on the same day, under exactly similar conditions, and, with the exception of the Kola, all cut on the same day, the Kola ripening five days later.

Mr. Lacombe's new wheat, which he has named Axminster, has not only long, beautifully-formed heads, but the straw is absolutely a clean clear golden color throughout its whole length, while it would be difficult to think of grain more heavily infected with black stem rust than the Marquis and early Red Fife which grew close beside it. The Kola is almost as badly infected but not quite.

Mr. Lacombe is not making the claim that he has found the absolutely resistant wheat to all forms of rust, but he is claiming, with every show of right, that he has produced a wheat that shows almost perfect resistance, when sown the Kola, which has been widely heralded as being almost rust resistant, has succumbed. In addition to its resistance to rust the Axminster wheat, grown under exactly similar conditions, yields about 30 per cent. more than Marquis. The berry is rather longer than Marquis and not quite so dark in color as either Marquis or Red Fife.

Head Hunters Not Brave

Geologists Had No Fear Of South American Tribesmen

South America's notorious head hunters can be placated with baby's tops and trinkets, according to Joseph Singewald, professor of economic geology at Johns Hopkins University, and Ernest Rosehen, another geologist, who have returned to New York after a trip into interior South America for geological research. The scientists said they found no bravery among the agrarians and haubumbras tribes which for centuries have preserved the heads of their slain foes by a process by which the heads are shrunk to the size of a large orange without losing their original proportions.

Although the geologists suffered danger and hardship to reach the places they wanted to study, they said they had to fear no attack from the head hunters. Hazardous canoe and motor truck trips over little used trails were the main difficulties encountered.

House Fly Never Grows

Does Not Change After It Emerges From Chrysalis

Seeing that the house fly is probably the commonest of all insects—that it is found in every part of the world, except the Polar regions, and that it is always outdaring itself upon us, it is odd that its history is so little known.

Children—and grown persons, too—are under the impression that little flies are young flies and big ones older flies. But this is a mistake, for a fly never grows. A fly begins as an egg—which turns into a grub. The grub eats and grows and turns into a chrysalis filled with a creamy fluid.

From this chrysalis the fly emerges quite perfect. After that, although it eats, it never grows at all.

Aeroplane Passengers Killed

Three passengers and the pilot of an Avion of the Amsterdam-Rotterdam line, were killed recently. The machine, on its way to Paris, fell in a wood 10 miles from the famous battlefield of Le Cateau.

While the big passenger plane was at a great altitude, peasants in the fields below noticed it splashing round. Suddenly it "shot down like a meteor."

The dead passengers were a Frenchman, a Dutchman and a German.

Her Suggestion

He.—You're cold. Shall I take off my coat and put it around you?

She (very sweetly, as he is a rich young fellow. You know how girls are).—You may put it around me but why take it off?

Uncle Ezra.—"You don't appear to have much company here."

Hostess.—"Why do you ehink so?"

Uncle Ezra.—"Cause your guest towels don't seem to have been used a mite."

INVENTORS

Booklet of "Needed Inventions" and blank form "Record of Invention" FREE. Send postcard to-day.
W. IRWIN HASKETT, 16 ELGIN STREET, OTTAWA, Canada.

Every Woman Deserves One

The SMP Roaster is a fine time saver. You put the roast or fowl in the oven. The roaster does the rest, bastes, roasts to perfection. It roasts with very little shrinkage, thus saving dollars every year. None of the tasty meat juices are lost; all the rich flavor is retained. Besides you can buy cheaper cuts, for it makes cheap cuts taste like choice ones.

The close fitting cover keeps all the cooking odors and the grease inside the roaster—the smell of cooking doesn't fill the house, and the oven is kept sweet and clean. Best of all, it cleans out in a jiffy after the roasting. These are splendid vessels. Price 85c. to \$3.50 according to size and finish. Sold in all hardware stores.

SMP Enameled ROASTER

BAREE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog. Is an Adaptation of This Story

SYNOPSIS

Nepeese, daughter of Pierrot, the trapper, carried Baree, the young wolf-dog, from her father's cabin into the woods. She was fearful of the return of McTaggart, the factor, whom, a few minutes before, she had pushed into a twenty-foot chasm when he made unwelcome advances to her. She met her father, who had learned that McTaggart had blood poison, the result of a bite on the hand by Baree when the factor found the dog in one of his traps.

CHAPTER XV.—Continued

It was not like other rains Baree had known. It was an inundation sweeping down out of the blackness of the sky. Within five minutes the interior of the balsam shelter was a slaverhath—half an hour of that torrential down-pour, and Nepeese was soaked to the skin. The water ran in little rivulets down her back and breast; it trickled in tiny streams from her drenched braids and dripped from her long lashes, and the blanket under her was wet as a mop. To Baree it was almost as bad as his near-drowning in the stream after his fight with Papayachisew, and he snuggled closer and closer under the sheltering arm of the Willow. It seemed an interminable time before the thunder rolled far to the east, and the lightning died away into distant and intermittent flashings. Even after that the rain fell for another hour. Then it stopped as suddenly as it had begun.

With a laughing gasp Nepeese rose to her feet. The water gurgled in her moccasins as she walked out into the open. She paid no attention to Baree—and he followed her. Across the open in the tree-tops the last of the stormclouds were drifting away.

Nepeese looked down and saw Baree. He was standing clear and unafraid, with freedom on all sides of him. Yet he did not run. He was

NERVOUS BREAK-DOWN

Pains in Back and Legs Relieved by Lydia E. Pinkham's Vegetable Compound

Ford, Ontario.—"I had a nervous break-down, as it is called, with severe pains in my back and legs, and with fainting spells which left me very weak. I was nervous and could not sleep nor eat as I should and spent much time in bed. I was in this state, more or less, for over two years before Lydia E. Pinkham's Vegetable Compound was recommended to me by my neighbor. Before I had taken five doses I was sitting up in bed, and when the first bottle was taken I was out of bed and able to walk around the house. During my sickness I had been obliged to get some one to look after my home for me, but thanks to the Vegetable Compound I am now able to look after it myself. I have taken Lydia E. Pinkham's Blood Purifier in turn with the Vegetable Compound, and I certainly recommend these medicines to any one who is not enjoying good health. I am quite willing for you to use these facts as a testimonial."—Mrs. J. SHEPHERD, 130 Jos. Janisse Avenue, Ford, Ontario.

Nervousness, irritability, painful times, run-down feelings and weakness are symptoms to be noted. Women suffering from these troubles, which they soothe have, should give Lydia E. Pinkham's Vegetable Compound a fair trial. All druggists sell this medicine.

W. N. U. 1691

of the pool, and watched her. Sometimes she was just under him, floating silently, her hair forming a cloud darker than the water about her; again she was cutting over the surface almost as swiftly as the others he had seen—and then with a sudden plunge she would disappear, and Baree's heart would quicken its pulse as he waited for her. Once she was gone a long time. He whined. He knew she was not like the beaver and the otter, and he was filled with an immense relief when she came up.

So their first night passed—storm, the cool, deep pool, the big fire; and later, when the Willow's clothes and the blanket had dried, a few hours' sleep. At dawn they returned to the cabin. It was a cautious approach. There was no smoke coming from the chimney. The door was closed. Pierrot and Bush McTaggart were gone.

CHAPTER XVI.

It was the beginning of August—the Flying-up Moon—when Pierrot returned from Lac Bain, and in three days more it would be the Willow's seventeenth birthday. He brought back with him many things for Nepeese—ribbons for her hair, real shoes, which she wore at times like the two Englishwomen at Nelson House, and chief glory of all, some wonderful red cloth for a dress. In the three winters she had spent at the Mission these women had made much of Nepeese. They had taught her to sew as well as to spell and read and pray, and at times there came to the Willow a compelling desire to do as they did.

So for three days Nepeese worked hard on her new dress and on her birthday she stood before Pierrot in a fashion that took his breath away. She had piled her hair in great glowing masses and coils on the crown of her head, as Yvonne, the younger of the Englishwomen, had taught her, and in the rich jet of it had half buried a vivid sprig of the crimson fire-flower. Under this, and the glow in her eyes, and the red flush of her lips and cheeks came the wonderful red dress, fitted to the slim and sinuous beauty of her form—as the style had been two winters ago at Nelson House. And under the dress, which reached just below the knees—Nepeese had quite forgotten the proper length, or else her material had run out—came the coup de maître of her toilet, real stockings and the wonderful shoes with high heels! She was a vision before which the gods of the forest might have felt their hearts stop beating. Pierrot turned her round and round without a word but smiling; but when she left him, followed by Baree, and flumping a little in the tightness of her shoes, the smile faded from his face, leaving it cold and staring.

There was a change in Pierrot. During the three days of her dress-making, Nepeese had been quite too excited to notice this change, and Pierrot had tried to keep it from her. He had been away ten days on the trip to Lac Bain, and he brought back to Nepeese the joyous news that McTaggart was very sick with pechipo—the blood-poison—news that made the Willow clasp her hands and laugh happily. But he knew that the Factor would get well, and that he would come again to their cabin on the Gray Loon. And when next time he came—

It was when he was thinking of this

WELL-MERITED SUCCESS

A distinguished citizen, honored politically and professionally, Dr. R. V. Pierce, whose picture appears above, made a success few have equalled. His pure herbal remedies which have stood the test for fifty years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a blood medicine and stomach alterative. It clears the skin, beautifies it, increases the blood supply and the circulation, and pimples and eruptions vanish quickly. Beauty is but skin deep and good blood is beneath both. For your blood to be good, your stomach must be in condition, your liver active. This Discovery of Doctor Pierce's puts you in fine condition, with all the organs active. Ask your nearest druggist for Doctor Pierce's Golden Medical Discovery, in tablet or liquid form, or send 10 cents for trial package of tablets to Dr. Pierce's Laboratory in Bridgeburg, Ontario.

Treat Colds Externally

For sore throat, bronchitis or deep chest colds, rub Vicks VapoRub briskly over throat and chest and cover with warm flannel.

Vicks acts in two ways—both direct: absorbed like a liniment, and inhaled as a vapor. A quick relief for the cold troubles of all the family.

VICKS VAPORUB
Over 21 Million Jars Used Yearly

that his face grew cold and hard, and his eyes buried. And he was thinking of it on this her birthday, and even as her laughter floated to him like a song. Bleu, in spite of her seventeen years, she was nothing but a child—a baby! She could not guess his horrible visions. And the dread of awakening her for all time from that beautiful childhood kept him from telling her the whole truth so that she might have understood fully and completely. Non, it should not be that. His soul beat with a great and gentle love. He, Pierrot Du Quesne, would do the watching. And she should laugh and sing and play—and have no share in the black forebodings that had come to spoil his life.

On this day there came up from the south, McDonald, the government map-maker. He was gray and grizzled, with a great, free laugh and a clean heart. Two days' he remained with Pierrot. He told Nepeese of his daughters at home, of their mother, whom he worshipped more than anything else on earth—and before he went on in quest of the last timberline of Banksian pine, he took pictures of Willow as he had first seen her on her birthday: her hair piled in glossy coils and masses, her red dress, the high-heeled shoes. He carried the negatives on with him, promising Pierrot that he would get a picture back in some way. Thus fate works in its strange and apparently innocent way as it spins its web of tragedy.

(To be continued)

Sensational Report Started in China

Switching of Picture Titles Responsible For War-Time Story

The sensational report that Germany was boiling down the bodies of her dead soldiers of the great war to utilize the fats for fertilizer, started in China, Belg. Gen. J. V. Charters, wartime chief of the British Intelligence Unit, and author of the story, said in an address revealing the origin of the tale for the first time.

General Charters said that while he was in China during the war he switched the titles on two pictures taken from dead German soldiers; one captioned "Cadever" showing a trainload of horses being taken to the rear for fertilizer factories, the other depicting a train taking dead German soldiers to the rear for burial. The pictures were sent to Chinese newspapers with the titles reversed. Six weeks later an English magazine published a letter from a Chinese reader revealing the story of the "horrible boiling down of German soldiers."

The story swept over the continent and eventually became a subject for debate in the House of Commons.

Fisheries Association Needs Funds

Asking a grant of at least \$10,000, a deputation representing the Canadian Fisheries Association waited upon the deputy minister of marine and fisheries, Ottawa. They received a sympathetic hearing. In presenting their claims the deputation stressed the needs for funds to continue their propaganda to educate the people of Canada to "Eat More Fish" and secure a bigger market.

An Oil for All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

Every man thinks he could think of something different for breakfast, but his wife knows he couldn't.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

Life is made up of countless things which must be counted on.

Rub the scalp with Minard's Liniment

King George Severe In Public Matters

But Easy Going in Private and Personal Affairs

Some of the Almeric Fitzroy "Indiscretions," about which too much fuss has been made, have at least had the advantage of bringing out certain aspects of King George's character and personality which, perhaps, were not sufficiently known to the man in the street. One of these is the King's severe punctiliousness in everything relating to the public service, as contrasted with his easy-going good nature in all private and personal affairs. A blundering royal servant may count on the mildest and most good humored rebukes, while a minister or state official who offends stands a good chance of a smart rap over the knuckles from "the highest quarter." With King Edward—keen statesman as he was—it was, oddly enough, the other way about.—London Mail.

A WOMAN'S WORK IS NEVER DONE

No Wonder Health Gives Out and She Becomes Weak and Despondent

It is literally true concerning woman in the home that her work is never done. She starts with housework when she rises in the morning and is kept busy up to the time she retires at night. The work must be done whether she is feeling well or not. It is no wonder that she often breaks down under the strain. She becomes breathless at slight exertion, feels exhausted if she walks upstairs. Headaches and dizzy spells become frequent, and life seems a burden. Much of this trouble is due to the fact that her blood has become thin and watery, and to regain her good health she must take a reliable blood-enriching tonic such as Dr. Williams' Pink Pills. The great value of this tonic medicine is shown by the statement of Mrs. Mary Nolan, Lintlaw, Sask., who says:—"When I began using Dr. Williams' Pink Pills I was a physical wreck. It was with great difficulty that I could do light housework. I suffered from headaches, my heart would beat violently at the least exertion, and I always felt tired and depressed. I did not sleep well at night, and I had no appetite—my limbs would swell as in dropsy. It was at this stage that a neighbor advised me to take Dr. Williams' Pink Pills. I had used the pills for some weeks before I began to feel their benefit, and thus encouraged I continued taking them for several months, when I was again as strong as well as ever I had been. I have no hesitation in saying that these pills are a remarkable blood builder and strength renewer and I shall ever be grateful for what they did for me."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Loose Nut

The paper spoke the other day about a loose nut wrecking a car. That is one trouble we have. There are too many loose nuts running around in cars. Some of them ought to be locked up. When a loose nut gets tight it may be worse, at that.—Los Angeles Times.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. H. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Flappers—Today and Yesterday

(Bert Kirkham hands the Recorder
the following clipping)

Girl will be girls—and nature
will be nature.

Nothing can stop them.

Grandmother flirted. Mother
spooned. Daughter pets, — but
they all got kissed, sooner or later.

Grandmother rubbed red calico
on her cheeks. Mother tinted hers
with red tissue paper dipped in
cologne. Daughter colors hers
with scented rouge. But they all
got painted, if with a different
brush.

Grandmother laced, mother pad-
ded, daughter paints,—but they
all did it in order to charm the mas-
culine eye.

Grandmother wore a hoopskirt,
mother wore a bustle, daughter
carries a lipstick,—but they were
all equally deceitful.

Grandmother cajoled her hus-
band, mother endured hers, daugh-
ter divorces hers,—but they all got
tired, now and then.

Grandmother used a broom,
mother used a carpet sweeper,
daughter uses a vacuum cleaner,—
but cleaning days are the same
old joy and the same old horror
today, yesterday and forever.

Grandmother drove the grey
mare, mother drove the dogcart,
daughter drives the flivver,—but
they are all "going somewhere"
and nobody can stop them!

Grandmother was proposed to
on a moonlight buggy ride, mother
was courted on a bicycle built for
two, daughter in a taxi cab,—but
they all got the same old thrill and
had the same old beautiful dreams.

Grandmother loved only one
man, mother one at a time, daugh-
ter, one after another,—but they
all got the same old apple sauce,
the same old surprises, the same
disappointment and heart pangs.

Grandmother blushed, mother
flushed, daughter "laughs it off,"—
but they all listen when a man
starts sentimental nonsense.

Grandmother knew how to make
pie, mother knew how to make a
dollar go a long way, daughter
knows how to make a living,—but
all amounts to the same thing
when it comes to making a good
helpmate.

Grandmother dropped her eyes
and clung to his coat lapel, mother
hung onto his arm and trembled,
daughter grapples him around the
neck,—but they all did their best
to keep him from getting away.

Grandmother coddled him, moth-
er bossed him, daughter joshes and
jollies him,—but they all knew
that a man has to be managed,
babied and mothered.

Grandmother called him "my

A BANK UNDER WESTERN ORGANIZATION

FOR nearly 50 years the Bank of Montreal has maintained offices in Western
Canada, ready to accept monies on deposit and loan these funds to farmers,
merchants, manufacturers and business men generally, upon terms consistent
with sound banking and the proper custody of its depositors' funds.

Since the first office was established in Winnipeg in 1878 the Bank has spread throughout
the Prairie Provinces until today it has 161 offices in Manitoba, Saskatchewan and Alberta.
An Assistant General Manager is resident in Winnipeg and Provincial Superintendents
are located at Winnipeg, Regina, and Calgary, ready to give prompt and efficient service
to the people of the West.

Small accounts are welcome and are accorded the same service as that given to large amounts.

Customers of the Bank have all the advantages resulting from Western organization com-
bined with the strength and facilities of a nation-wide banking institution having world-
wide connections.

BANK OF MONTREAL

Total Assets in excess of \$700,000,000

suitor", mother called him "my fi-
ance", daughter calls him "my boy
friend",—but they all managed to
lead him to the altar in the end.

Other times, other manners,—
but all roads lead to Matrimony
when a woman drives.

Hon. George Hoadley, Minister
of Agriculture, is conducting ne-
gotiations for Alberta to supply
horse meat to Holland. If this
market is opened up it would en-
able Alberta to dispose of a good
deal of scrub stock to advantage.
The price offered f.o.b. Antwerp is
six cents a pound. A sample ship-
ment of 2000 pounds will be for-
warded.
